Application/Control Number: 09/700,391

Art Unit: 1651

The application should be reviewed for errors. Error occurs, for example, in claim 13 in the recitation of "are cleaved". Properly the claim should read "is cleaved".

The amendment filed 12/18/03 is acknowledged. Claims 13-23 are being examined on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 is vague, indefinite and confusing in the recitation of "an insulin and an analog thereof". It is unclear what is intended to be encompassed by "analog" in this context. Is it analogy by structure or by function?

Claim 13 is vague, indefinite and confusing in the recitation wherein of a reaction wherein preproinsulin produces an analog of insulin.

To clarify antecedent basis, the last sentence of claim 13 should be amended to "said insulin or analog thereof..."

Response to Arguments

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

With respect to "analog", the disclosure cited does not constitute a definition of this terminology, but only a discussion of how "analogs" may be "derived" (Specification, page 3, paragraph 5). In other words, this paragraph in the specification is exemplary rather than definitive.

In response to the contention that the specification states that the definition of analog is "human or animal insulin in which one naturally occurring amino acid reside is substituted, deleted and/added to the A and/or the B chain of a naturally occurring insulin", it is noted that the specification is misrepresented. The specification, in fact, reads:

"Insulin analogs are derived from naturally occurring insulins, namely human

Application/Control Number: 09/700,391

Art Unit: 1651

insulin or animal insulins, for example porcine or bovine insulin, by substitution or absence of **at least** one naturally occurring amino acid residue and/or addition of **at least** one amino acid residue to the A and/or B chain of the naturally occurring insulin". (emphasis added).

There is no clear relationship between the material alleged to be in the specification and the actual record. Moreover, nothing on this record discloses or suggests that an analog having a large portion thereof substituted by unrelated naturally occurring amino acid residues would be cleaved by the same one or more enzymes as the native protein, or that such an analog would retain insulin activity.

Therefore the rejection is deemed proper and it is adhered to.

The claims appear to be free of the art of record.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irene Marx whose telephone number is 571-272-0919. The examiner can normally be reached on M-F (6:30-3:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Wityshyn can be reached on (571) 272-0926. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-9000.
